

Xcel Energy Heating and Cooling Rebates

With Xcel Energy heating and cooling rebates, put money in your pocket. And, keep it there!

We want to help you save money two ways. First, with a rebate check from us reducing your initial equipment cost. Second, with lower operating costs throughout the life of the appliance.

Qualifying Efficiencies and Rebates

Based on qualifying equipment, rebates are offered according to the following schedule. For more details, click on a link at the left to go to the page for that product.

Registered Contractors

You must use a registered contractor to qualify for any of our cooling rebates. Cooling rebate applications are available only through registered contractors. Search for a registered contractor:

http://hvacaducation.net/xcel/public_search.cfm

Equipment	Efficiency Rating	Rebate
Central AC & Air Source Heat Pumps	14.0 – 14.9 SEER	\$180
	15.0 – 15.9 SEER	\$280

Natural Gas Water Heater Rebates**		
Water Heater – standard tank type	.62 EF	\$40
Water Heater – standard tank type	.64 EF	\$60
Water Heater – tankless	.80 EF	\$100

We do not offer rebates on individual appliances (washers, dryers, window air conditioners, refrigerators, freezers, clothes washers). However, we offer appliance rebates through our Home Performance Rebate program: http://www.xcelenergy.com/Residential/Programs/Resources/Pages/Home_Performance_Rebate.aspx, which requires you to make five or more improvements to your home.

ENERGY STAR® is a government/industry partnership that makes it easy for you to save money and preserve our natural resources. Look for products with the ENERGY STAR® to ensure the appliance is energy-efficient.

* Visit www.energystar.gov for a list of ENERGY STAR qualified ground source/geothermal heat pump products.

** EnergyStar begins certification of water heaters January 2009.
